## **DETAILED ACTION**

### ***Status of the Claims***

Claims 1-19 are pending and are considered herewith.

### ***Information Disclosure Statement***

The Information Disclosure Statement submitted on September 28, 2004 is acknowledged.

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a) because figure 4 is of poor print quality that hinders the ability of any one skilled in the art from interpreting properly. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet

Art Unit: 1617

submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Specification*

2. The use of the trademarks Oxyhex®, CAPROS™, Emblica™, Eusolex®, Mexoryl®, Uvinul®, Neo Helixopan®, Megasol®, Silatrizole®, Uvasorb®, Sachotec®, RonaCare™, UV-Pearls™, Merck KgaA/Rona®, and COLORONA® have been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

3. The abstract of the disclosure is objected to because of typographical errors. It is noted that "ageing" is spelled incorrectly in the abstract. Correction is required. See MPEP § 608.01(b).

### *Claim Objections*

4. Claims 2 and 17 objected to because of the following informalities: typographical errors. It is noted "ageing" is spelled incorrectly. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 and 4-15 provide for the use of “one or more compounds selected from compatible solutes for inhibiting the release of ceramides”, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
6. Claims 2 and 17 provide for the use of “one or more compounds selected from compatible solutes for the prophylaxis and protection of human skin against premature skin ageing”, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
7. Claims 3 and 16 provide for the use of “one or more compounds selected from compatible solutes for the prophylaxis and protection of human skin against wrinkling”, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
8. Claim 18 provides for the use of “compatible solutes for the prophylaxis or treatment of photodermatitis”, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim

Art Unit: 1617

is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

9. Claim 19 provides for the use of "compatible solutes for the prophylaxis or treatment of polymorphic photodermatosis, lupus erythematoses and/or light urticaria", but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

10. Claims 1-19 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
